

Digital Wealth Insights – keeping up to date with the latest developments

Keeping up to date with the latest developments

Digital wealth, robo advice, automated advice and a host of other phrases are being used to describe a wide range of emerging technology-based financial services.

But what does it all mean and how do you compare them all?

Our Digital Wealth Insights study explores leading edge developments in this important emerging market and looks month by month at key players and new organisations, what they offer and how they compare. It's designed to provide an extensive overview of the market place to enable informed analysis and discussion.

Testimonials for the report:

"A great summary of the range of digital wealth propositions and insights into comparison between them."

Peter Horrell, Managing Director

"This is an invaluable piece of analysis and insight. To have the reviews of all the main players in the market side-by-side, all reviewed through the same lens, by people that actually understand the industry, the customers and the technology is unique and hugely powerful."

Jonathan Hewitt - Direct Platform Specialist (previously Head of Fidelity Personal Investing)

Digital Wealth Insights report

FTRC have spent many years examining how advice is evolving both in the UK and internationally with a particular focus on the role of technology.

Our flagship Digital Wealth Insights report provides a current state assessment of the various types of WealthTech propositions available in the UK.

The report investigates the key data, essential functionality, core components and principles within each digital advice proposition providing:

- An unbiased view of players in the UK digital advice market
- Analysis of the propositions currently available for:
 - Non-advised investment
 - Advised investment
 - Personal Financial Management
 - Micro-saving tools
- Comparison tables for an easy understanding of who does what
- Informed commentary and analysis
- A high level overview of FTRC's 'best practice' digital advice models

What is DigitalWealthInsights.com

Digital channels and FinTech are reinventing wealth management and financial advice at an astonishing rate.

New technology such as artificial intelligence, machine learning and deep learning have worked into financial services generating much interest and reinventing traditional methods of delivering financial services.

For many, the fast pace of these new services and has clouded the industry confusion.

DigitalWealthInsights.com provides these unparalysed insights into the digital advice service.

It is irrefragable that

Strategic business partnerships, investment opportunities

Who is doing what?

Key: Understanding the different types of proposition

Key data	Essential Functionality	Core Components	Principles
Key data refers to the user's individual personal information.	Two essential processes are required in order to optimise the functionality of the various automated	We have identified a number of core components within each type of advice proposition	Whilst not essential, these principles should serve as the foundation to build consumer education, longevity, engagement.
Traditional face-to-face			recommend positions these principles that brings functionality position

2: Advised investment proposition

An advised digital investment proposition provides:

- An automated online investment advice service with
- A streamlined user journey
- Engaging content to better educate the client
- At a reduced cost to traditional face-to-face financial advice

These online propositions guide the customer through an end-to-end investment advice process for medium to long-term ~~savings products such as pensions, general investment accounts (GIAs), and individual savings~~ accounts (ISAs).

Advice typically up their referral not involve investment

Advised investment latter are for

The customer investment client is placed

The recommended investment

Many proposition telephone
